

According to minutes from the Fire Advisory Board,

- Paging changes will occur this year, but later than expected
- If the fire departments plan on asking the towns to assist with funding for the change over the time is now
- The fire (B) frequency has been getting weaker due to an amplifier problem which will be resolved once the new microwave system is installed, which has commenced.
- One new tower has been erected and the shelter built and the Providence site should be completed soon.
- A majority of the Departments have expressed their displeasure with the quality of the workmanship from Capital Digitronics.
- The new system will either be a MA/Com or Motorola, and MA/Com is represented by Digitronics.
